Bengaluru, India

## SUMMARY

Passionate about Web3 & Cybersecurity — Skilled in leveraging cutting-edge technology to secure digital landscapes and build decentralized solutions — Continuously learning and adapting in the ever-evolving tech world.

## EDUCATION

- **Meghnad Saha Institute of Technology, Kolkata** Kolkata, India  
*Bachelor of Technology - Computer Science and Business System; GPA: 7.66* 2022 - 2026  
*Courses: Blockchain , Cybersecurity , Artificial Intelligence, Machine Learning, Networking, Databases*
- **Army Public School, Nehru Road, Lucknow** Lucknow, India  
*12 th , CBSE — Percentage : 89.6* 2021

## SKILLS SUMMARY

- **Blockchain:** Solidity , Decentralization, Consensus Mechanisms ,Cryptography , Hardhat
- **CyberSecurity:** Network Security ,Security Information and Event Management (SIEM) tool, Intrusion Detection Systems
- **Languages:** C++, Python, JavaScript, SQL
- **Frameworks:** Firebase, Supabase, TensorFlow, Django, NodeJS
- **Tools:** GIT, MySQL, SQLite, AWS Bedrock, Jira, MongoDB
- **Platforms:** Linux, Web, Windows, GCP, AWS
- **Soft Skills:** Leadership, Event Management, Writing, Public Speaking, Time Management

## PROJECTS

- **STOCK AI - AI-Driven Stock Market Forecasting and News Platform** : An AI-powered platform that predicts stock prices using statistical, machine learning, and deep learning models while analyzing real-time financial news. Features include AI avatar-based news presentation, sentiment analysis, technical indicators, interactive dashboards, and TradingView visualizations.  
Tech - Python, TensorFlow, Scikit-learn, ARIMA, SARIMA, LSTM, XGBoost, FinBERT, Yahoo Finance API, React, Node.js, TypeScript, Tailwind CSS (July '26 – Present) (link)
- **NFT Vault – Decentralized Asset Management for Creators:** An open-source platform that enables artists and creators to mint, manage, and monetize NFTs with built-in royalty enforcement and secure metadata storage. Supports multi-chain deployment and integrates with decentralized storage for media authenticity. Features include creator dashboards, lazy minting, auction support, and IPFS-backed provenance tracking.  
Tech: Solidity, Ethereum, Polygon, Web3.js, IPFS, React, Chainlink, Hardhat (March '25) (link)
- **DeFi Vault – Decentralized Lending and Yield Platform** : A decentralized finance platform enabling users to lend, borrow, and earn interest on crypto assets without intermediaries. Features include dynamic interest rates, collateralized loans, and yield farming pools. Designed with smart contract-based automation, real-time analytics, and Chainlink oracles for price feeds to maintain liquidity and minimize risk.  
Tech: Solidity, Ethereum, Chainlink, Web3.js, React, Hardhat, IPFS (Dec '24) (link)
- **Cyber Trigger Tool – ML-Powered Digital Forensics Assistant** : Developed for Smart India Hackathon (SIH), this tool streamlines digital forensic investigations by automating the collection, analysis, and reporting of incident data. It features an intuitive interface for investigators, evidence import, anomaly detection using AI/ML, and comprehensive reporting capabilities. Designed to reduce response time and improve accuracy in cyber incident handling.  
Tech: Solana CLI , Alchemy -RPC Provider , Solidity , Chalk , Hardhat ,Wireshark , Library -ptsk3 ,libewf (Sep '24)

## VOLUNTEER EXPERIENCE

- **Member — Phoenix — Cultural Society, MSIT** Kolkata, India  
*Conducted online and offline technical & soft-skills training .* Sep 2024- July 2026
- **Member — Google Developers Group Kolkata** Kolkata, India  
*Organized events, conducted workshops and delivered workshops reaching over 7000 developers.* Sept 2024 - Oct 2024

## CERTIFICATIONS

Associate Cloud Engineer (link), Blockchain Security (link), ChatGPT Prompt Engineering for Developers (link), Google AI Essentials (link) , Google Cybersecurity Specialization (link) , Prompt Design in Vertex AI (link), Develop GenAI Apps with Gemini and Streamlit (link), Introduction to Generative AI(link)
